## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakahara et al (2003/0083151). Nakahara discloses a golf club head comprising a primary body made from a metal or first material and a crown made from reinforced plastic or second material. Please note the plastic satisfies the 'unsuitable for welding' limitation. The crown covers an opening or recess in the primary body (see figures). The crown includes a reinforcing (reinforced plastic) edge secured to the main body (figure 2c). The club also includes a hosel, heel, toe and rear portions.

### ***Response to Arguments***

Applicant's arguments filed 4-30-08 have been fully considered but they are not persuasive. Applicant argues Nakahara does not disclose a reinforced edge mask bonded to the periphery of the cover and secured to the primary body. As shown in the rejection above, Nakahara discloses a cover, see figure 1A, and the reinforcing edge

mask is the periphery of the cover, also shown in figure 1A by the dashed line. Since the reinforcing edge is considered the periphery of the cover it is inherently bonded to the cover and is also secured to the body as shown in the figures.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
